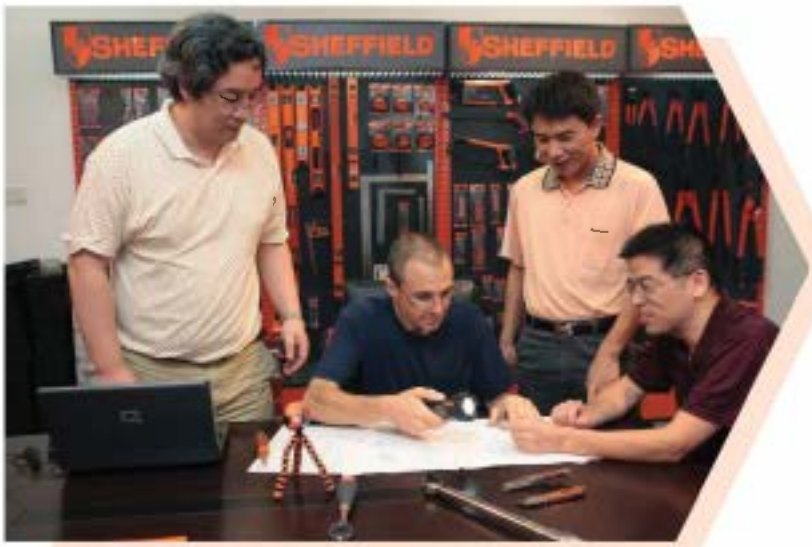
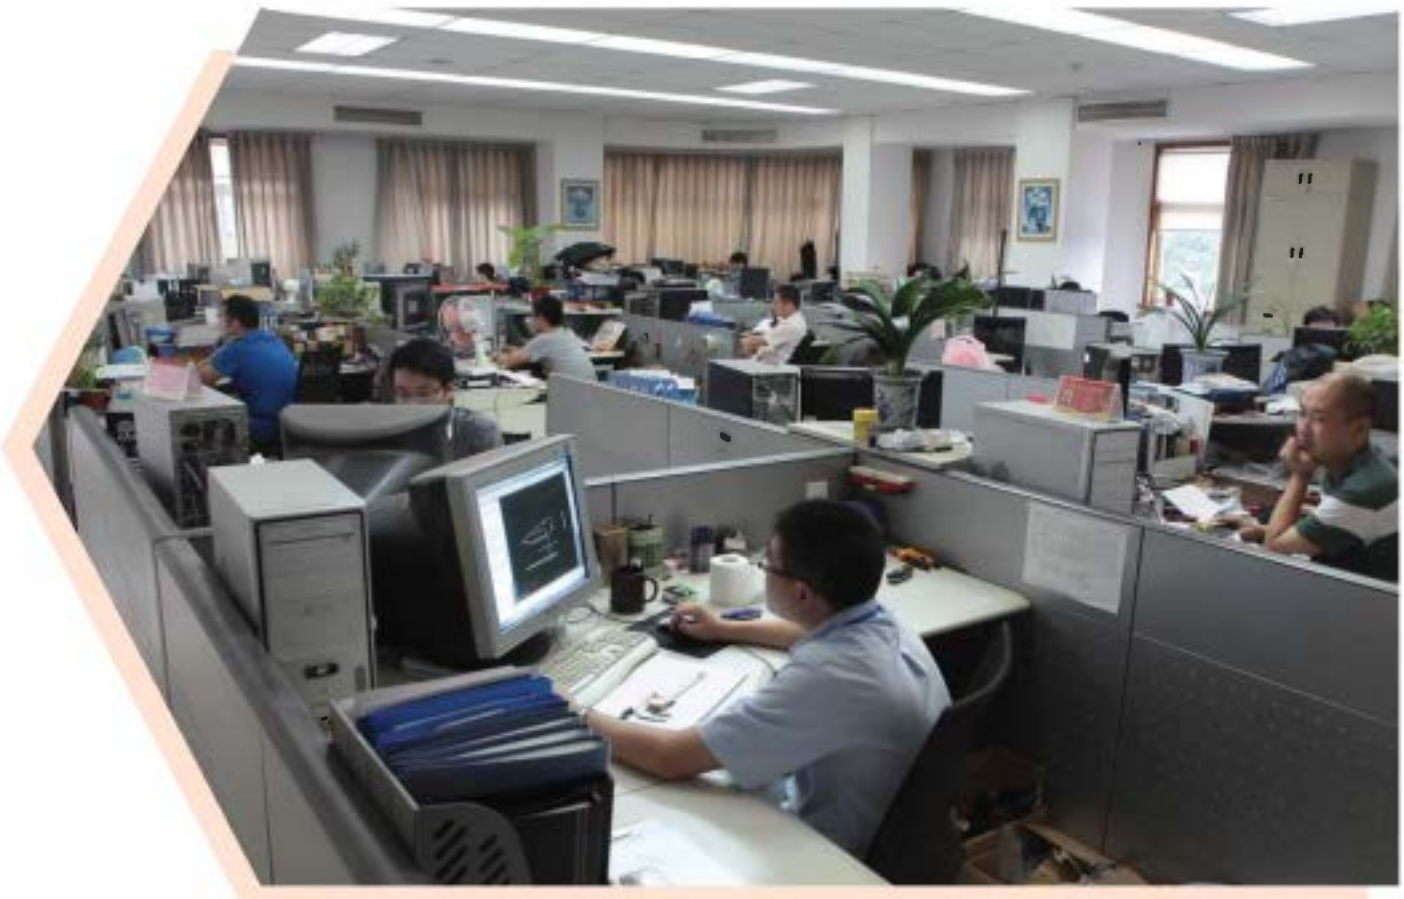
R&D CAPABILITIES

SHEFFIELD has a professional team of more than 100 product design and research engineers. We produce an average of 400 new products annually. Our design team, coupled with our tooling division, can produce SLA samples within 24 hours and working prototypes within a week. Your designs will become a reality and allow you to be the first to market.





PRODUCTION CAPACITY

SHEFFIELD has expanded with two production bases with a combined total of 1.6 million square feet for manufacturing and product development.

Production Base Glance

Production Base

1.07 million square feet of manufacturing space

Manufacture Center

2 million square feet of manufacturing space

DETECTION & EXPERIMENTAL CENTER

Our QC Division has 50 engineer working in our test labs as well as monitoring production at all of our factories. Our primary test lab at our Headquarters is equipped with some of the most state of the art machinery available. Every product and package we manufacture must pass a rigorous testing process both during and post production before it is cleared for shipment.
