RBS Detergents for Laboratories

Solutions that meet all needs

- Highly alkaline cleaning agents.
- Neutral cleaning agents.
- Acidic cleaning agents.

Manual and ultrasonic processing

RBS T 105

Alkaline cleaning agent with high wetting, emulsifying and dispersing properties

RBS T 115

Phosphate free alkaline cleaning agent. Suitable for use in laboratories which perform water analysis (analysis of phosphorous and phosphates).

RBS T 230

Neutral cleaning agent for manual and ultrasonic cleaning. High emulsifying and dispersing properties.

RBS T 305

Acidic cleaning agent based on phosphoric acid for manual and ultrasonic cleaning. Provides original aspect and brightness to cleaned surfaces.

Automated processing

RBS 50 PF

Phosphate free mild alkaline no foam cleaning agent. Surfactant free. Ensures effective cleaning of glassware and laboratory equipment.

RBS A 156

Phosphate free highly alkaline no foam cleaning agent. Surfactant free. Provides high detergency power for efficient cleaning in labwasher.

RBS A 285 SOLID PF

Phosphate free alkaline cleaning agent in powder form. Provides the necessary emulsifying, dispersing and wetting properties for effective cleaning in labwasher.

RBS A 375

Acidic solution based on citric acid. Recommended for use in the neutralising cycle after the main alkaline washing cycle with RBS 50 pF or RBS A 156.

RBS A 261

Caustic alkali free weakly alkaline cleaning agent for use in labwashers.
